## Work Experience

2020 - Now

### Front End Architect

*ManageYourID – Lima, Peru (Remotely)*

I have an architect Role to help across projects with architecture definition and best practices in the front-end side.

- Provide best-fit architectural solutions for projects - influencing frontend architecture solutions and best practices for ManageYourID.
- Offer technology consultation and create tools for ManageYourID's ArcGIS map solution - providing users with a clean UX.
- Design and provide recommendations for enhancements to the client's map application and other tools - adhering to industry standards and processes.

**Technologies:** c#, ARCGIS Maps, .Net MVC, Web API, Rest Full, SQL, React, Angular, JavaScript, Azure DevOps, GIT.

2014 - 2020

## SME Front End / Front End Architect/ Senior UI Developer

*Belatrix Software a Globant Division – Lima, Peru*

I started as Senior Software developer and I did a carrier path as SME (Subject Matter Expert) Front End, Front End Architect and lead a community of practices to help with technical solutions across projects in the company.

- Worked as a catalyst on high priority initiatives to develop new products, support technology operations and maintain exemplary standards.
- Designed industry-leading solutions on projects for Belatrix - liaising with clients on prototypes, solutions, and technical complexities on solutions.
- Participated in collaborative technical discussions that focus on frontend architecture and development on projects.

**Technologies:** Node.js, React, Angular, Vue.js, Google Cloud, Git, C#, .NET, MVC, Web API, Rest API, SQL, SVN, Service Stack.

2012 – 2014

## Senior UX / UI Engineer

*Axcess Financial – Lima, Peru*

UX engineer and lead in UX team of the company, I helped and participated in a lot of projects in Axcess Financial to integrate UX workflow and process development to create applications with attractive and interactive concepts and also UX best practices.

I worked closely with a multidisciplinary team to create intuitive sites and interfaces that redefined the market landscape while ensuring the attainment of clients' business and marketing objectives and brand strategies to increase the tools inside the company.

**Technologies and tools:** A/B Testing, Rapid prototype, Site maps and user flows, Wireframes, Usability test, card sorting, landing pages, Heat Map, Axure RP Pro, Adobe Photoshop and Illustrator.

Java, JavaScript, Angular JS, Primefaces, SVN.

2010 – 2011

## Software Developer

*Avantica Technologies – Lima, Peru.*

- Worked with stakeholders on the AMP project to identify and document requirements, contribute to technical designs, and implement solutions.
- Actively participated in the definition and evolution of industry standards, best practices, and procedures on the project.
- Operated at the leading edge of technology on the project - recommending and justifying changes to existing products/services/processes.

**Technologies and tools:** .Net, MVC, jQuery, JavaScript, C# and SQL, SVN.

2006-2011

## Software developer

*Quipu Technology S.A.C. – Lima, Peru.*

*I started as a software developer then I took on roles as Scrum Master, Front End developer, and technical lead.*

- As Scrum Master I coordinated and applied scrum methodology and handled quality assurance on solutions within the development cycle on projects for Quipu Technology.
- Participated in the design and delivery of new features on solutions in a collaborative, agile/scrums environment for Quipu.
- Developed, scaled, and optimized solutions on projects for clients.

**Technologies and tools:** Asp Net, MVC, SQL, JavaScript, JQuery, Backbone, Continuous Integration, Web Services, SVN, Mercurial, WCF, TFS, Team City.

2006

### Internship

*Techrules – Expert Time Systems – Madrid, Spain*

Software developer in Techrules, I was implementing and maintenance site web to virtual classroom and courses online.

**Technologies:** ASP, JavaScript, HTML, SQL, and Flash.
